Research Papers

Spectrum of proton-induced mutagenesis of the <i>Escherichia coli</i> <i>crp</i> gene K. Takimoto, K. Yamamoto, T. Sagara and K. Ishizaki (Japan)	1
Complementation of xeroderma pigmentosum cells by microinjection of mRNA fractionated under denaturing conditions: an estimation of sizes of XP-E and XP-G mRNA Y. Okuno, S. Tateishi and M. Yamaizumi (Japan)	11
Strand bias in mutation involving 5-methylcytosine deamination in the human <i>hprt</i> gene A. Skandalis, B.N. Ford and B.W. Glickman (Canada)	21
Effects of the <i>umuDC</i> , <i>mucAB</i> , and <i>samAB</i> operons on the mutational specificity of chemical mutagenesis in <i>Escherichia coli</i> : I. Frameshift mutagenesis M. Watanabe, T. Nohmi and T. Ohta (Japan)	27
Effects of the <i>umuDC</i> , <i>mucAB</i> , and <i>samAB</i> operons on the mutational specificity of chemical mutagenesis in <i>Escherichia coli</i> : II. Base substitution mutagenesis M. Watanabe, T. Nohmi and T. Ohta (Japan)	39
Induction of the alkylation-inducible <i>aidB</i> gene of <i>Escherichia coli</i> by cytoplasmic acidification and <i>N</i> -ethylmaleimide G.V. Smirnova, O.N. Oktyabrsky, E.V. Moshonkina and N.V. Zakirova (Russia)	51
Radiation-induced mitotic gene conversion frequency in yeast is modulated by the conditions allowing DNA double-strand break repair M. Frankenberg-Schwager, D. Frankenberg and R. Harbich (Germany)	57
G ₁ arrest and cell-cycle-dependent clastogenesis in UV-irradiated human fibroblasts W.K. Kaufmann and S.J. Wilson (USA)	67
Loss of S-phase-dependent radioresistance in <i>irs-1</i> cells exposed to X-rays N. Cheong, X. Wang, Y. Wang and G. Iliakis (USA)	77
Restoration of the DNA damage resistance of <i>Deinococcus radiodurans</i> DNA polymerase mutants by <i>Escherichia coli</i> DNA polymerase I and Klenow fragment P.D. Gutman, P. Fuchs and K.W. Minton (USA)	87
On the quantitative relationship between O ⁶ -methylguanine residues in genomic DNA and production of sister-chromatid exchanges, mutations and lethal events in a Mer ⁻ human tumor cell line A. Rasouli-Nia, Sibghat-Ullah, R. Mirzayans, M.C. Paterson and R.S. Day III (Canada)	99
Mutagenic response and repair of cis-DDP-induced DNA cross-links in the Chinese hamster V79 cell mutant V-H4 which is homologous to Fanconi anemia (group A) K. Studzian, P. Telleman, G.P. Van der Schans and M.Z. Zdzienicka (Netherlands)	115
DNA-damaging agents stimulate the formation of directed reciprocal translocations in <i>Saccharomyces cerevisiae</i> M. Fasullo, P. Dave and R. Rothstein (USA)	121
Radiation hypersensitivity of LEC strain rats controlled by a single autosomal recessive gene M. Hayashi, T. Okui, D. Endoh, F. Sato, N. Kasai and S. Namioka (Japan)	135
Increased DNA-repair capacity and the modulation of 2 proteins in and metallothionein overexpressing Chinese hamster cell line T. Robson, H. Grindley, A. Hall, J. Vormoor and H. Lohrer (UK, Canada)	143

Molecular analysis of the <i>XP-D</i> gene in Italian families with patients affected by trichothiodystrophy and xeroderma pigmentosum group D C. Mondello, T. Nardo, S. Giliani, J.E. Arrand, C.A. Weber, A.R. Lehmann, F. Nuzzo and M. Stefanini (Italy, UK, USA)	159
An ERCC5 gene with homology to yeast RAD2 is involved in group G xeroderma pigmentosum T. Shiomi, Y.-n. Harada, T. Saito, N. Shiomi, Y. Okuno and M. Yamaizumi (Japan)	167
Altered DNA ligase III activity in the CHO EM9 mutant S. Ljungquist, K. Kenne, L. Olsson and M. Sandström (Sweden)	177
Differential repair of UV damage in a developmentally regulated gene of <i>Dictyostelium discoideum</i> S.K. Mauldin, T.M. Freeland and R.A. Deering (USA)	187
<i>Review</i>	
One-sided invasion events in homologous recombination at double-strand breaks A. Belmaaza and P. Chartrand (Canada)	199
<i>Research Papers</i>	
The <i>E. coli recA</i> gene can restore the defect in mutagenesis of the <i>psa4-1</i> mutant of <i>S. cerevisiae</i> M.A.M. Morais Jr., J. Brozmanová, M.S. Benfato, J. Duraj, V. Vlčková and J.A.P. Henriques (Brazil, Slovak Republic)	209
Gene-specific DNA repair of UV-induced cyclobutane pyrimidine dimers in some cancer-prone and premature-aging human syndromes M.K. Evans and V.A. Bohr (USA)	221
A new UV-sensitive syndrome not belonging to any complementation groups of xeroderma pigmentosum or Cockayne syndrome: siblings showing biochemical characteristics of Cockayne syndrome without typical clinical manifestations T. Ltoh, T. Ono and M. Yamaizumi (Japan)	233
Increased sensitivity to DNA-alkylating agents in CHO mutants with decreased poly(ADP-ribose) polymerase activity M.V. Witmer, N. Aboul-Ela, M.K. Jacobson and T.D. Stamato (USA)	249
Isolation and preliminary characterisation of an X-ray-sensitive mammalian mutant cell line (WMXRS-1) M.J. McKay, G.J. Mann, D.A. McDonald, S. Jones and R.F. Kefford (Australia)	261
Roles of transcription and repair in alkylation mutagenesis T. Ito, T. Nakamura, H. Maki and M. Sekiguchi (Japan)	273
Endonuclease VII of phage T4 nicks <i>N</i> -2-acetylaminofluorene-induced DNA structures in vitro E. Bertrand-Burggraf, B. Kemper and R.P.P. Fuchs (France, Germany)	287
<i>Contents, Vol. 314 (1994)</i>	297
